

Generic Drug Savings in Tennessee

Generic medicines drive savings, not costs. Generics saved Tennessee **\$6 billion in 2015**, according to the 2016 Generic Drug Savings & Access in the United States report compiled by the QuintilesIMS Institute for Healthcare Informatics on behalf of the Generic Pharmaceutical Association (GPhA).

Generic drug manufacturers are true drivers of health system value – enabling access to safe and effective generic medicines for patients, public programs, taxpayers, employers and others. GPhA welcomes the chance to work with policymakers, regulators, stakeholders to increase generic competition and expand patient access to more affordable medicines.

Medicaid:	\$658 million
Medicare:	\$2 billion
Cash (Non-Insured)	\$403 million
Commercial Insured:	\$2.9 billion
Total	\$6 billion

Generic Drug Savings in the U.S.

Generics are 89% of Prescriptions Dispensed but only 27% of Total Drug Costs
